

Brief

Wales and West Housing were refurbishing the communal lounge and reception of Lord Pontypridd House, a sheltered accommodation scheme, after building a new scooter store. As well as wanting to give the interiors a complete refresh and an updated image, they needed new flooring and new furniture. They required advice on the interior design as well as the delivery of a full residents' consultation. The specification was for appropriate robust furniture, in a modern style.

Overview

Our experienced team, including our interior designer, carried out a full consultation with Wales and West residents. Furniture samples and mood boards were brought to show the residents and to offer inspiration. All of Buckingham Interiors furniture is contract standard, offering the perfect blend of style with value for money. The dedicated Buckingham installation team fitted a new carpet and flooring from reception through to the communal lounge, and created a lounge area and a bistro area, all with minimum disruption to residents and staff.

Feedback

Wendy Newton, Scheme Manager for Wales and West Housing, said: "Just to say a big thank you for all your help and support with our communal lounge."

"Everyone is so impressed with the new look from residents, staff and visitors."
